NOTICE OF CORRECTION

To: Mrs. Lucille Uhinck  
c/o Rick Uhinck  
(b) (6)

This Notice of Correction (NOC) is issued under the authority of Chapter 43.05 RCW, Technical Assistance Programs.

According to the Kitsap County Health District, you are the owner of property on Gorst Creek southeast of and adjacent to State Route (SR) 3 which contains an abandoned solid waste refuse site (landfill or garbage dump). The northwest side of the abandoned solid waste landfill has experienced a significant slope failure which allowed land fill debris to enter into Gorst Creek. This is a violation of the following laws and regulations:

1. Chapter 90.48.080, Revised Code of Washington, Discharge of polluting matter in waters prohibited (See Attached).

To achieve compliance with the above, the property owner (Mrs. Lucille Uhinck) must:

- Prepare and submit to the Department of Ecology within ten (10) days upon receipt of this notice a plan which addresses the following:
  - a) Interim strategy for stabilization of failed landfill slope so that no further debris or material from the landfill will enter Gorst Creek.
  - b) Plan and time table for removing landfill debris which was deposited in and on the banks of Gorst Creek for approximately 3/4 mile downstream of the landfill.

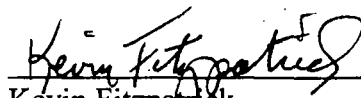

Failure to correct this situation may result in Ecology taking formal enforcement actions, which may include monetary penalties.

Technical assistance is available from a number of private consulting firms for this type of assistance. Technical Assistance with the applicable rules and regulations regarding waste discharges to waters of the state is available from Ecology by contacting Robert Wright at (206) 649-7060.

Notice of Correction  
Page 2 of 2

You may request an extension of the thirty (30) day deadline, for good cause, by contacting Kenneth White in writing and providing the reasons why you are requesting the extension. Your request must be received no later than fifteen (15) days after you receive this NOC. Kenneth White may be contacted by writing to the Department of Ecology, Northwest Regional Office, 3190 160th Avenue, Bellevue, WA 98008-5452.

DATED April 4, 1997, at Bellevue, Washington
